SkinMed Chlorhexidine Spray

Spray in a pressure container 150 ml, 300 ml

Characteristics:

Veterinary product, blue to blue-green solution in spray form containing chlorhexidine, for topical treatment of skin, hooves and external genitalia. The product is used to cleanse the treated area, in which the ingredients (chlorhexidine) contribute to reducing the possibility of negative effects of undesirable micro-organisms.

When treating with the product, it can also be applied simultaneously to the instruments and surfaces used.

Active ingredients:

Chlorhexidine diacetate 10,84 mg/g

Excipients:

Isopropyl alcohol, Polysorbate 80, Brilliant Blue FCF, Demineralised water, Acetic acid 99%, Solstice

Dosage and method of use:

The product is applied as a spray from a distance of 15 - 20 cm.

The product must be shaken before use. The treatment can be repeated as required. For external use only. The product must not be used to disinfect the teats and udders of dairy cows. Transient local reactions may occur in hypersensitive individuals.

Target animal species:

Cattle, pigs, poultry, dogs, cats.

Caution:

For animals only! For external use only!

The product is under constant pressure. Protect from direct sunlight and do not expose to temperatures above 50°C. Do not damage the pressure container. In case of eye contact, flush with a stream of water. Store the product at 15°C to 25°C, keep out of sight and reach of children.

Shelf life:

24 months
