SkinMed Chlorhex Gel 2%

Veterinary medicine, 50 g, 100 g, 200 g and 500 g.

Characteristics:

If necessary, cut out the affected area and apply the product. The veterinary product is recommended in cases of hot spot, as well as for skin treatment in cases of irritation (e.g. after flea bites, after tick removal, ...), in inflammatory processes of the skin and in cases of allergic skin diseases. The product can also be used for complete protection of the oral cavity, where it reduces the burden of unwanted microorganisms and counteracts plaque formation.

Ingredients:

Chlorhexidine diacetate 20 mg/g, Natrosol 250 HHX, Glycerin, Dimethyl sulfoxide, Eumulgin CO 40, Euxyl PE 9010, Lavender oil, purified water

Method of use:

Apply the gel directly to the affected area in a sufficient layer and prevent the animal from licking the treated areas. Repeat this procedure at least twice a day.

Caution:

If symptoms of skin irritation worsen, avoid reuse of the product and consult your veterinarian for further action. Do not apply the product in or around the eyes.

Storage:

Store at 15 to 25°C. Protect from freezing. Protect from direct sunlight. Keep out of sight and reach of children.

Target animal species:

Cattle, pigs, poultry, dogs, cats.

**Shelf life:**

24 months
